NETCHEMIA™

On-Demand is in Demand - and for Good Reason

A reliable, intuitive way to manage the special education process is critical to the design of an appropriate individualized education program for each student. Historically, school districts in Missouri were required to hand-write IEPs or contend with less than ideal software.

netIEP On-Demand gives school districts an alternative. **Your staff can create and print compliant IEP documents, run reports, and receive e-mail alerts all through a common web browser. Administrators can easily build reports, set up additional staff members, create goals, and export information to Excel.**

What On-Demand means to you:

- Totally web-based; supports both Mac and PC platforms
- Free upgrades to the most recent version of the application
- A designated consultant to support your team
- A low-risk, year-to-year subscription
- Fast implementation time; within 30 days
- Simple pricing; no hidden fees
- Unmatched customer support

netIEP Intelligent Forms

Our proven intelligent forms engine provides an easy way for your staff to enter IEP data plus the assurance that your printed documents will be more compliant, professional, and parent-friendly.

Offered in Partnership with

Endorsed by

✓ Unique netIEP Benefits

netIEP Customer Portal

Netchemia's commitment to quality and service extends long beyond the day you make your purchase. Access IssueTracker, a web-based tool that enables our support staff to bring assistance to issues and access to our customer discussion forum.

netIEP Sandbox Training Environment

Want a separate netIEP environment for training? Give your team the ability to train without fear and test new features without disturbing live student data. The sandbox is a clean, safe way to train people anywhere in a real world environment.

netIEP Report Wizard

Powerful, flexible reporting features to help you track, understand, and manage information. This reporting system allows you to build custom reports step-by-step without any technical knowledge. You can build, sort, print, or export professional looking reports into Excel.
